

I am a long distance truck driver. Before I purchased XM Radio for my truck there were many long miles where I could not get any radio reception at all in this beautiful country of ours. Now since becoming a member of the XM Radio Network, I can get weather updates and pertinent traffic information to help me do my job more efficiently and safely. Please consider the thousands of truck drivers who are benefiting from XM's programming when you are debating the NAB's petition 04-160. Please reject Petition 04-160 and allow us (the long distance truckers) to continue using XM Instant Traffic & Weather. Thank you.
